## DETAILED ACTION

### *Claim Objections*

Claims 25 and 26 are objected to because of the following informalities: In claim 25, line 3, use of “providing **for** a grommet” appears awkward. What is being provided for the grommet? It appears “for” should be deleted. In line 5, “so that the aperture” should be deleted as it appears an inadvertent duplication of language. In claim 26, line 3, use of “providing **for** a hose” appears awkward. What is being provided for the hose? It appears “for” should be deleted. Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 27, line 6, there is no antecedent basis for “said upper chamber” and “said lower chamber”.

In claim 28, line 6, there is no antecedent basis for “said upper chamber” and “said lower chamber”.

Art Unit: 1744

In claim 29, line 6, there is no antecedent basis for "said upper chamber" and "said lower chamber".

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knights (US patent 4,339,839).

The patent to Knights discloses the invention substantially as is claimed. Note figures 5 and 6 which show an embodiment wherein frame member (110) has a closed upper channel defined between cross members (114,124) and an open bottom channel (118). A wiper blade having a crown, neck and body is fitted into said open channel with said neck extending through a slot defined by the open channel. Fluid can be feed through an inlet into the closed channel and exited through openings (156) in the cross member (124). Knights also discloses embodiments (figures 1-4) wherein the frame member (10) is made of extruded aluminum.

The patent to Knights discloses all of the above with the exception of the figures 5,6 embodiment being of rigid extruded aluminum.

Art Unit: 1744

While Knights discloses that the figures 5,6 embodiment is made of flexible plastics material to enable adaptation to curved surfaces, it appears obvious that the figure 5,6 embodiment could be made of extruded aluminum, as is suggested for the figures 1-4 embodiments, if such is to be used or is desired to be used to wipe a flat surface. Knights clearly suggests making the supporting frame member of a wiper blade of extruded aluminum when wiping a flat surface. Given such, it would have been obvious to one of skill in the art to make the frame of the figures 5,6 embodiment of extruded aluminum to enable improved wiping of a flat surface.

With respect to claim 21, plug (134) is considered to stake a wall of the bottom channel to grip and fix the wiper element within said bottom channel.

With respect to claim 24, note end plugs (134) which act to releasably maintain the wiper element in the bottom channel.

***Allowable Subject Matter***

Claims 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 27-29 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

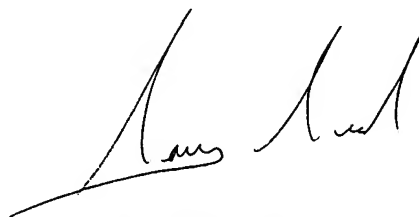

Art Unit: 1744
